

Staying Out of Trouble With Used Oil Storage and Hazardous Waste Management

FREE
Workshops

The North Central Florida Regional Planning Council is providing these **FREE** workshops which will provide information about how to comply with hazardous waste regulations and used oil storage requirements.

This workshop will cover topics that apply to most types of businesses that generate potentially hazardous waste. Learn useful information on how to manage your hazardous waste in a cost-effective and legal manner. Common regulated wastes include: used oil and filters, anti-freeze, solvents, rags, paint wastes, lead-acid batteries, Dentist amalgams, fluorescent tubes and Mercury containing high intensity light bulbs.

These workshops will follow Hazardous Materials Reporting (EPCRA Tier 2) How-to-Comply Workshops being held from 10:00 - 11:45 a.m. at the same locations. This compliance assistance project is being presented in partnership with the Florida Department of Environmental Protection and Alachua County Environmental Protection Department.

To register for one of these workshops or for additional information, please contact LEPC Director Dwayne Mundy at mundy@ncfrpc.org or (352) 955-2200 ext. 108. Additional information, maps and directions are available at <http://ncflepc.org/comply>.

1:30 – 3:30 p.m.

January 23, 2012
Leveda Brown Environmental
Park, Meeting Room, 5115 N.E.
63rd Avenue, Gainesville, FL
